North China Electric Power University

Languages

- Mandarin Chinese (Native)
- English(C1)- 2023

Profile

I'm a technical game designer from China, based in the Netherlands. I build and polish playable prototypes in Unreal Engine 5, with experience in 3Cs, combat, enemy AI, and UI/UX. My goal is to become a technical designer who can take ownership of complex systems.

5 years of management experience in China have helped me collaborate across disciplines and understand where I can contribute most to a team.

Game Projects

Icarus (2026) — Technical Game Designer · itch.io
Third-person mecha action | 16 developers | 8 weeks | UE5 | PC

- Designed and implemented movement and attacks for two ranged enemy types.
- Designed and implemented UI/UX: health/energy bars, enemy indicators, a style bar, and Common UI interfaces

Palegrave (2025) — Technical Game Designer · itch.io
Arena survival FPS | 12 developers | 8 weeks | UE5 | PC

- Designed and implemented five enemy behavior variants with different Boids configurations.
- Designed and implemented combat VFX to improve hit feedback and visual impact.
- **Awards:** Year 1 Best Tech & Best Industry

Solo Prototypes

- **Devil May Cry 5 Prototype** — Built a basic combat framework. Video
- **Witcher 3 Prototype** — Built inventory and basic combat systems using GAS. Video
- **Snooker Slammer** — Built a snooker collision game. Video
